Appzillon Edge

Platform Driven

Appzillon Digital Banking has been developed using Appzillon, an award-winning low-code application development platform. The platform driven approach provides unparalleled flexibility in developing, delivering, and maintaining digital solutions.

Multi Experience Support

Appzillon uses a single code base for all supported experiences such as mobile, web, kiosk, chat, etc. This approach makes it easy to introduce new features across channels quickly.

Micro App Architecture

Appzillon follows micro-app-architecture that breaks down features in an app into granular yet fully functional units that are reusable and modular.

Open, Secure, and Scalable

Appzillon uses industry standard technologies. It follows a robust and performance driven scalable architecture to support secure interactions and high volumes.

AI Powered

Appzillon includes a repository of machine learning models that can be seamlessly integrated into various areas such as chatbots, product recommendation engines, predictive analytics, etc.

End-to-End Automation Driven

Appzillon follows a unique development approach to build screens, controllers and integration adapters automatically from enterprise service definitions. It also supports automated regression.
